

Research & Development is a dynamic and knowledge-intensive area of the life science and chemical industry. Involving highly educated and specialized professionals, it faces the challenges of improving productivity and efficiency.

In order to master these challenges, we specialize in supporting a wide range of stakeholders in clinical research, such as pharmaceutical companies, national health organizations, investigator clinics, pharmacology units, CRO's or CRA's. Our vision is to make use of internet technology, standardization and integration on data- and business process level to provide innovative process- and technology-based solutions:

- to enable/optimize electronic data exchange between partners, authorities, service providers and investigators
- to enable/optimize business process collaboration via the Internet
- to enable the comparison of data between studies (Clinical Data Warehouses) and data archiving
- to meet the need from patients and the public for clinical trial transparency (Trial Registry, Patient Portal)
- to enable long-term archiving of clinical trial data

Since its foundation in 1993, Wega Informatik AG and its associates have been invested and committed to Research & Development (R&D) departments in Life Science and Chemical Industries.

Key strengths

Proficient experience in the area of Clinical Research
Knowledge of complex processes and systems within the international pharmaceutical industry

Technical expertise in state-of-the-art IT technologies (Oracle, J2EE, .NET) required for optimizing the clinical development business and meeting customer needs, such as:

- Web applications
- Portal applications
- Highly secured systems with data encryption and PKI infrastructures
- Integration technologies such as Web-Services, EDI, EAI, SOA
- Use of standards, such as CDISC, BRIDG

Accustomed to working in validated and highly regulated environments

Access to a worldwide network of expert consultants
Unbiased consulting as we are not a vendor of COTS ("Commercial-Off-The-Shelf") products.

Made in Switzerland

Located in the heart of the Swiss BioValley, in Basel, we provide our services to customers in Switzerland and Europe.

Clinical research competencies

wega has gathered profound experience in several areas within Clinical Research, such as:

- Clinical trial management (CTMS)
- Clinical data warehousing
- Electronic data capture (EDC)
- Clinical sample management
- Drug safety
- Drug supply
- Pharmacokinetics (PK/PD)
- Electronic document management
- and others

IT service portfolio

Since 1993, wega offers a wide range of top quality services adapted to the needs of our customers. Among other, some examples are:

- Assessing your potential standard software vendors
- Managing your IT-projects and investments
- Improving your business processes
- Designing an IT-solution matching to your needs
- Engineering your tailor-made software solution
- Migrating your legacy data to new databases
- Smoothly integrating your IT-systems
- Validating your computer system (CSV)
- Maintaining your software till end of its life-cycle (SLA)
- Supporting your productive Oracle database (DBA)

Services

- Life Science Consulting
- Business Analysis
- Solution Engineering

- Technical Consulting
- DBA Services
- Project Management
