

Analytical Instrument Control Services (AICS)

Do you have many standalone instruments in your laboratory and want to connect them to one system?

Nowadays many companies provide advanced solutions which support the following:

- connection of a diverse range of instrument types to one single system
- automatic calculations, documentation, data processing and reporting
- secured storage of all data objects
- advanced user management, including LDAP integration
- audit trail to record all relevant actions
- electronic signatures
- compliance with regulatory standards FDA 21 CFR Part 11, EU GMP Annex 11 and Data Integrity ALCOA+ guidelines
- one-way or bi-directional integration with third party systems such as LIMS, LES, ELN and ERP
- hardware and desktop virtualization or even cloud-based installations

wega supports you with professional services for all your needs around analytical instrument control systems on your way towards laboratory digitalization.

We have trained and experienced staff with knowledge of the major laboratory software packages on the market e.g. METTLER TOLEDO LabX™, Metrohm OMNIS, Metrohm tiamo™, Waters® Empower™, Thermo Scientific™ Chromeleon™

Services We Offer

- Landscape Strategic Consulting
- Process & Requirements Analysis
- System Deployment
- System Configuration
- Computer System Validation (CSV)
- Project Management
- Organizational Change Management (OCM)
- Method Development and Validation
- Service Level Agreements
- Interfacing with other software
- Customized User Trainings
