

Electronic Lab Notebook (ELN)

What can you expect from an ELN?

- Do you struggle to record and manage your research data and documentation?
- Do you spend a significant amount of time to retrieve and access your research data?
- Is traceability and reproducibility of data an issue?

Modern ELN solutions are user-friendly and provide a wealth of functionalities and benefits for your laboratories with the following capabilities:

Structured and unstructured data capture

- Use of standardized and design of ad-hoc templates
- Coverage of small and large molecules entity documentation

Collaboration capabilities

- Sharing of experiments with team members and cross-laboratories
- Providing restricted access to CROs

Integration capabilities

- Use of APIs to connect to external services and data sources
- Out of the box integration with many office and specialized applications

Data access / searchability / reporting

- Enterprise SSO and access right management
- Full text search and flexible reporting

Data security and IP compliance

- Customizable review/approval process
- Built for GxP and IP compliance

A successful selection of your ELN is highly dependent on your business requirements, business cases, and the existing IT landscape.

What can wega offer?

We support your ELN project journey from the analysis phase and system selection to implementation and maintenance of the ELN.

This can include

- "As-Is" analysis
- Definition of Requirements ("To-Be")
- RFI/RFP Process
- System Roll-Out
- Migration of Legacy Data
- Systems Integration
- User Support and Training

We are vendor independent and objective. Our multilingual team members have dual qualifications (in science and informatics). We offer you flexible support in different areas (technical support, project management, business analysis and implementation). We support you with our in-depth and up-to-date market knowledge and our broad experience from many successful projects at customers of different sizes.
