

Smart Robotics & Automation

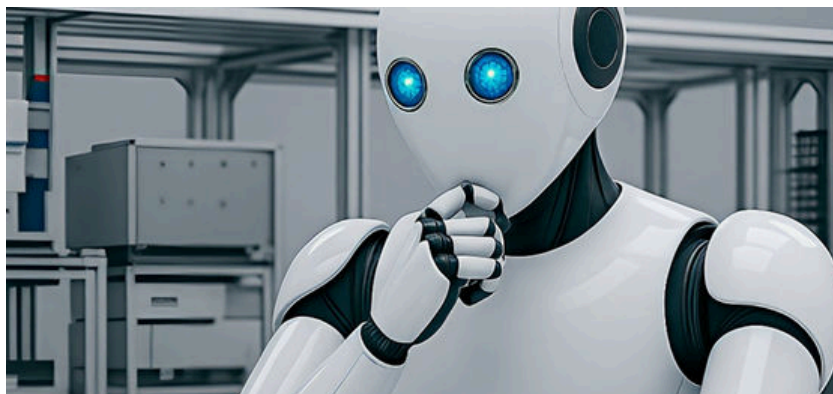

Driving Successful Laboratory Automation — with Confidence and Clarity

Laboratory automation offers tremendous potential by maximizing **throughput, data integrity, and process reliability**. Recent robotic advancements are accelerating this transformation, redefining efficiency across **R&D and QC environments**.

wega guides your transition from manual tasks to **fully automated end-to-end processes**. With over 30 years of **Life Science Informatics expertise**, we bridge the gap between technical and digital innovation and regulatory compliance.

wega supports you through every stage of your project lifecycle. In addition, we provide a wide range of complementary services, including **system integration** and **validation support**.

Why wega:

wega unites automation, software, and validation/CSV expertise to simplify complex lab automation. Our deep expertise ensures a rapid ramp-up, allowing us to add immediate value where needed. As a vendor-neutral expert, we reduce risk, accelerate delivery, and ensure successful implementation.

Scoping

- Process Mapping
- User Requirements
- Dependencies Evaluation

Vendor Selection

- Vendor Interaction
- Evaluation Support
- RFI/RFP Documentation

Implementation

- Technology Support
- Project Management
- Acceptance Tests
- Change Management

Go-Live & Beyond

- Business User Training
- Application Support
- Continuous Enhancement
